ABSTRACT

Basic financial statistics of public television licensees in the United States, Puerto Rico, Guam, and American Samoa for the 1971 fiscal year are listed. Data are given for 133 licensees which control 207 television stations. Information is compiled which relates to the allocation and disbursement of funds, income, direct operating costs, and capital expenditures. Six graphic figures, 31 summary tables, and 57 detailed tables provide the structural format for the presentation of the material. Added to the report are three appendixes which deal with a survey of public television licensees, questionnaire items, and a list of public television stations on the air during the year, including locations, call letters, and broadcast channels. Financial Statistics of Public Television Licensees:

Fiscal Year 1971

national center for educational statistics

FILMED FROM BEST AVAILABLE COPY

Total income for television operations for 133 public television licensees in the Aggregate United States during the Fiscal Year 1971, amounted to almost $162 million. The direct operating costs and capital expenditures for television operations were $113 million and $29 million, respectively.

As indicated below, public television licensees increased considerably in each of the three summary financial statistics. The income, direct operating costs, and capital expenditures for television operations of all licensees (133) showed noticeable increases (41 percent, 35 percent, and 43 percent respectively) in Fiscal Year 1971 from those of the 128 reporting television licensees in Fiscal Year 1970.

	All Licensees		
	FY 1970	FY 1971	Percent Increase
(Number of licensees)	(128)	(133)	
Income for television operations	$99,956,372	$140,816,318	41
Direct operating costs for television operations	83,677,225	113,362,449	35
Capital expenditures for television operations	20,460,290	29,220,003	43

FOREWORD

This publication is part of a planned series of statistical reports on public broadcasting, based on data provided to the Corporation for Public Broadcasting (CPB) by public television and public radio licensees. The U. S. Office of Education's National Center for Educational Statistics (NCES) has supported the data collection, analysis, and preparation of reports in the series. John Golden, Director of Planning, Research and Evaluation at CPB, and Boyd Ladd, Assistant Director for Statistical Development in NCES, directed the efforts of the two agencies.

Financial statistics for 133 public television licensees on the air in the aggregate United States cover the entire Fiscal Year 1971.

Publication of this information was made possible by the various station managers and executive directors who took time from their very busy days to complete the questionnaires.

INTRODUCTION

This report presents basic financial statistics of public television licensees in the aggregate United States (United States, American Samoa, Guam, and Puerto Rico) during Fiscal Year 1971. Its major objective is to provide the public broadcasting community--Federal and other legislators, administrators, and researchers, as well as the communications industry as a whole--with quantitative information on and summary analysis of the financial status of public television.

The present report includes financial statistics of 133 public television licensees on the air during Fiscal Year 1971. These 133 licensees owned and operated 207 television stations in the aggregate United States.

The data contained in this report were collected between October 1971 and April 1972 in the 1971 annual survey of public television licensees made by the Corporation for Public Broadcasting, a nonprofit corporation established by the Public Broadcasting Act of 1967. The survey data were gathered in most cases from station general managers or executive directors of the licensees.

ANALYSIS DESIGN

Data on financial statistics were tabulated and examined by sources and disbursement of funds. In order to show the varying characteristics of financial status, data were, in most cases, presented and analyzed by three major variables: type of licensee, geographic region, and adjusted budget size. 1/

There were four types of public television license holders:

COMMUNITY ORGANIZATIONS--Independently created corporations and foundations not part of State and local governments.

INSTITUTIONS OF HIGHER EDUCATION--Universities and colleges.

LOCAL PUBLIC SCHOOL SYSTEMS--Local administrative units which exist primarily to operate schools or to contract for school services. These units may or may not be coterminous with county, city, or town boundaries.

STATE AUTHORITY, STATE EDUCATION AGENCY, MUNICIPAL AUTHORITY, AND OTHER LICENSED AGENCIES--State boards of education or State authorities and commissions set up by acts of legislation specifically for operating public stations and networks. Also included are the one municipal authority established by the city of New York and the two nondomestic licensees, the Departments of Education in American Samoa and Puerto Rico.

1/ The types of public television licensees are based on the CPB-USOE classification and the geographic regions in the aggregate United States are based on the USOE classification. See Financial Statistics of Noncommercial Television License Holders: Fiscal Year 1970, Corporation for Public Broadcasting, Washington: 1971, pp. 1-2, or revised edition, DHEW Publication No. (OE) 72-67, U. S. Government Printing Office, Washington: 1972, pp. 1-2. Adjusted budget size is also employed as an analytic variable because (a) the sizes have a considerable influence on the financial characteristics of the stations and licensees, and (b) these five adjusted budget sizes have been adopted as the basis for Community Service Grant allocation for the licensees by the Corporation for Public Broadcasting. See Employment Statistics of Public Television Licensees: June 30, 1970 (advance edition), Corporation for Public Broadcasting - U. S. Office of Education, U. S. Government Printing Office, Washington: 1972, p. 4.

Data were reported for five geographic regions (aggregate United States):

North Atlantic	Great Lakes and Plains	Southeast
Connecticut	Illinois	Alabama
Delaware*	Indiana	Arkansas
District of Columbia	Iowa	Florida
Maine	Kansas	Georgia
Maryland	Michigan	Kentucky
Massachusetts	Minnesota	Louisiana
New Hampshire	Missouri	Mississippi
New Jersey	Nebraska	North Carolina
New York	North Dakota	South Carolina
Pennsylvania	Ohio	Tennessee
Rhode Island	South Dakota	Virginia
Vermont	Wisconsin	West Virginia

West and Southwest	Outlying Areas
Alaska*	American Samoa
Arizona	Canal Zone*
California	Guam
Colorado	Puerto Rico
Hawaii	Trust Territory of Pacific Islands*
Idaho	Virgin Islands of U. S.*
Montana*	
Nevada	
New Mexico	
Oklahoma	
Oregon	
Texas	
Utah	
Washington	
Wyoming	

* No public television licensee as of June 30, 1971.

Adjusted budget sizes fall into five categories:

Less than $100,000
$100,000 - $249,999
$250,000 - $699,999
$700,000 - $1,999,999
$2,000,000 and over

Summary and detailed tables of financial statistics are presented at the end of the narrative section of this report. In detailed tables, percentages may not add to 100 because of rounding.

Appendix A is addressed to surveys of public television licensees, and Appendixes B and C reproduce questionnaire items and a list of public television stations on the air during Fiscal Year 1971, respectively.

The following terms are used in this report:

ADJUSTED BUDGET SIZE--Total operating expenses plus amount of institutional support.

CAPITAL EXPENDITURES--Expenditures for acquiring land, buildings, machinery, equipment, facilities, hardware, automotive equipment, office equipment, and for significant improvements to existing major items of property and equipment. Not included (but charged to operating expenses) are routine repairs and maintenance, rents, expendable supplies and materials, items with a life expectancy of less than 2 or 3 years, and items of inconsequential cost.

DIRECT OPERATING COSTS (BUDGETED OPERATING EXPENSES)--Actual costs of operations which were budgeted for and were under the management control of the individual station, network, or center. Depreciation, capital expenditures, repayment of loans, invested money, allocation of money to reserve funds, or costs absorbed by other institutions are not included in this category.

GIFTS--Donations of machinery, equipment, supplies, or other tangible things of value--as distinct from money.

INCOME--All sources of money or appropriations of money received or entered in the books as receivable in the current reporting year. This does not include monies withdrawn from reserve accounts which were established with funds received in prior years; borrowed monies from banks or other sources; or gifts and institutional support from individuals and other institutions.

INSTITUTIONAL SUPPORT--Costs absorbed by other institutions.

INSTRUCTIONAL TELEVISION (ITV) SERVICES (INCOME)--Estimated income or appropriation received as a result of or in support of the instructional and classroom programing services of television station or network.

LOAN--Amounts received from loans, notes, and other borrowed sums.

PRODUCTION--Costs associated with the production of programs and programing materials at local station or network facilities.

PROGRAMING--Costs of acquiring and scheduling programs.

PUBLIC TELEVISION STATION--A station which is 1) publicly owned (by a local community or municipality, State agency, school system or college, or public corporation); and 2) subsidized (by State or local taxes or foundation grants). It is eligible for support from CPB and Federal facility grants.

REPAYMENT OF LOANS--Monies used for the repayment of notes and debts. They are <u>not</u> included under direct operating costs or capital expenditures.

TECHNICAL--Costs associated with repairs, maintenance, control, and technical operations not includable elsewhere.

TELEVISION OPERATIONS--This category is provided for setting out amounts which apply to broadcast television operations or production only. This does <u>not</u> include radio and other operations, such as Closed Circuit Television (CCTV), Instructional Television Fixed Service (ITFS), and other university or academic activities.

TOTAL CAPITAL EXPENDITURES TO DATE--Accumulated capital expenditures to date. Depreciation and inflation factors of the expenditures over the years are <u>not</u> taken into account for these amounts.

TRANSFERS OF FUNDS FROM (WITHDRAWN FROM INVESTMENTS AND PRIOR YEARS' APPROPRIATIONS)--Transfers of funds from reserve accounts, investments, or building funds and from other balances of funds appropriated or received in previous years.

TRANSFERS OF FUNDS TO (INVESTED OR CARRIED OVER INTO FOLLOWING FISCAL YEAR)--Transfers of funds to reserves, investments, building funds, etc., to be carried over into following fiscal year.

SUMMARY OF THE RESULTS

PUBLIC TELEVISION LICENSEES AND STATIONS

A total of 133 public television licensees operated 207 stations in the aggregate United States during fiscal year 1971. Most of the licensees owned and operated one or two stations; however, some, especially licensees among State/municipal authorities, operated a number of satellite stations. State/municipal authorities, although comprising the smallest category of licensees (21), operated the largest number of stations (67). Institutions of higher education held 44 licenses and operated 61 stations, while community organizations had 46 licenses and managed 56 stations. Local public school systems, with 22 licenses, maintained 23 stations. (See table 1.)

Licensees among community organizations were largely concentrated in the North Atlantic and the Great Lakes and Plains regions. The Southeast and the West and Southwest regions dominated in number of licensees among local public school systems. The Southeast region accommodated more licensees of State/municipal authorities than any other region in the aggregate United States. The three licenses in the Outlying areas were granted to State/municipal authorities. (See table 1.)

Licensees of State/municipal authorities and community organizations were relatively large in adjusted budget size. The most common adjusted budget size of public television licensees was $250,000 - $699,999 (60), followed by $700,000 - $1,999,999 (35), $100,000 - $249,999 (18), $2,000,000 and over (12), and under $100,000 (8). (See tables 2 and 3.)

ALLOCATION AND DISBURSEMENT OF FUNDS

Total funds (revenues) of the 133 public television licensees amounted to $162 million during Fiscal Year 1971. Of these funds, 92 percent was accounted as income, 6 percent was transferred from prior years' appropriations, and the remaining 2 percent was received from loans. Because the financial operations of a sizable number of public television licensees were combined with their affiliated radio and other kindred operations,

all financial data of these licensees were included in the total funds.2/ Of the total income, 95 percent ($141 million) was received for television operations and the remaining 5 percent ($7.7 million) was contributed to income for radio and other operations. Transferred income (withdrawn from prior years' appropriations and investments) and loan income amounted to $13 million.

Out of the total funds, 74 percent ($120 million) was expended for direct operating costs and 19 percent ($29 million) was spent for capital expenditures. Five percent of the funds was disbursed as investment or carried over into the next fiscal year and the rest (2 percent) was expended for repayment of loans. Most of the direct operating costs (94 percent) and capital expenditures (98 percent) was spent for television operations. (See highlights and figure 1.)

INCOME

Total Income: Fiscal Year 1971

Total income for television operations for 133 public television licensees reached almost $141 million during Fiscal Year 1971. This represents an increase of 41 percent over income in Fiscal Year 1970, when a total of 128 licensees reported. Total income ranged from $38 thousand to $17 million.

Significant increases over the previous fiscal year's amounts occurred in income received from the following four sources: Federal Government (a 93 percent increase), foundations (87 percent), other State governments (86 percent) and public broadcasting agencies (80 percent). On the other hand, local school boards and other local governments contributed income decreased from the prior fiscal year's amounts by 1 percent and 13 percent.

The licensees among community organizations received the largest amount of the total income ($67 million or 47.5 percent), while licensees among local public school systems were responsible for the smallest amount of the total (slightly less than $10 million or 6.9 percent). In terms of median income of the licensees, the State/municipal licensees topped the listing with $1.4 million, followed by community licensees with $713 thousand.

2/ Thirty-two dual licensees reported their financial operations jointly for both television and radio stations. A total of 29 dual licensees operated both public television stations and other operations, such as Closed Circuit Television (CCTV) and Instructional Television Fixed Service (ITFS). (For detailed information on financial statistics of radio and other operations of the public television licensees, see tables 11 through 13.)

By region, the North Atlantic reported the largest amount of total income (36.7 percent of the total) and the Southeast showed the next largest amount (23.2 percent). The concentration of large community licensees in the North Atlantic and of large State/municipal licensees operating various network systems in the Southeast accounted for this. (See table 4 and tables A-1 through A-3.)

Total Income by Source

The largest sources of public television licensees' income during Fiscal Year 1971 were State school boards and State governments (33 percent of the total), ollowed by local school boards and local governments (14.2 percent of the total) and public broadcasting agencies (10.5 percent of the total). (See table 14.)

State contributions to licensees among State/municipal authorities exceeded 81 percent of the income of these licensees. For licensees among institutions of higher education the sources of the largest percentages of income were institutions of higher education (34.1 percent) and State school boards and State governments (34.7 percent). Insofar as most of the institutions of higher education were represented by State colleges and universities, the actual contributions from State sources to licensees among institutions of higher education might be far above 60 percent of these licensees' total income. Licensees among local public school systems relied heavily on local boards of education as a source of income, receiving 76 percent of their funding from them. Community licensees depended on a variety of sources of income, among them foundations (contributing 23.3 percent of the licensees' total income), public broadcasting agencies (18.0 percent), subscribers (12.1 percent), etc. (See table 15.)

Licensees in the Southeast region and those in Outlying areas received most of their income from State sources (61 and 73 percent respectively), while licensees in the North Atlantic region depended on income from foundations, State sources, public broadcasting agencies, etc. Licensees in the West and the Southwest received income from local school boards, public broadcasting agencies, State sources and other sources, with local school boards contributing the largest percentage of the licensees' incomes and other sources the smallest percentage. For licensees in the Great Lakes and Plains region, the leading sources of income were, in descending order, institutions of higher education, local school boards, and the Federal Government. A study of licensees' adjusted budget sizes showed that the smaller the adjusted budget, the greater the percentage derived from Federal sources. Among the licensees with an adjusted budget size of $2,000,000 or over, foundations, State governments, and public broadcasting agencies were the largest sources of income. (See tables 16 and 17.)

Institutions of higher education, local school boards, State school boards, and State governments made their largest grants of funds to public television licensees in the corresponding categories. Though HEW facilities grants were made to some licensees in each category, more than 50 percent of the total of such funds went to State/municipal licensees. The Corporation for Public Broadcasting distributed funds to 128 public television licensees. Community licensees were the recipients of 83 percent of the funds granted, with those licensees with the largest adjusted budget sizes receiving 81 percent of the funds. Most of the income from foundations, auctions, other business and industry, and subscribers was reported by community licensees (98 percent, 92 percent, 97 percent, and 96 percent, respectively), especially by the largest licensees in adjusted budget size. (See tables 15 through 17 and tables A-4 through A-24.)

Institutional Support (Costs Absorbed by Other Institutions) and Gifts 3/

A total of 77 public television licensees reported $7 million as institutional support (costs absorbed by other institutions) during Fiscal Year 1971. Institutions of higher education received more institutional support (34 percent of the total) than any other type of licensee. By region, total institutional support (amount) was rather evenly distributed among all regions except Outlying areas where no institutional support was reported. In terms of adjusted budget size, $250,000 - $699,999 and $700,000 - $1,999,999 received more than 78 percent of the total institutional support (amount). (See table 9.)

Slightly less than $1.5 million in gifts (for machinery, equipment, supplies, or other tangible things of value--as distinct from money) was donated to 32 public television licensees. Community licensees, especially those in the West and Southwest region and of the largest adjusted budget size ($2,000,000 and over), received the majority of these gifts. (See table 9.)

Income Attributed to Instructional Television Services

A substantial portion of the total income for public television operations was derived from instructional television services during Fiscal Year 1971. An estimated $29 million (20 percent of the total $141 million income for television operations) was allotted for instructional and classroom programming services. (See table 10.) State/municipal licensees reported

---

3/ For technical reasons, institutional support and gifts are not included in total income for television operations in this report.

the largest amount ($11 million or 37 percent of the total) and this represented 28 percent of the total income for these licensees' television operations. Over 52 percent of the total income of the licensees among public school systems was received for instructional television services. By region, the licensees in the Southeast region reported more income derived from instructional television services (44 percent of the total) than those in any other region in the aggregate United States. (See table 10.)

Direct Operating Costs

Total Operating Costs: Fiscal Year 1971

Total direct operating costs of public television licensees exceeded $113 million during Fiscal Year 1971. This shows a 35 percent increase in direct operating costs over that in Fiscal Year 1970 when 128 licensees responded. Among increased categories of direct operating costs, production expenses was the most noticeable (a 76 percent increase) 4/ during the period. The increase of 51 percent was more apparent in "other expenses" (costs other than salaries and wages) than in salary and wage expenses during the period. (See tables 18 through 20.)

Total direct operating costs for the licensees ranged from $36 thousand to $17 million. The median direct operating cost ($1 million) of State/municipal licensees was the highest among various types of licensees, followed by community licensees ($551 thousand). By region, the North Atlantic reported the largest amount of direct operating costs ($47 million) and median income ($685 thousand) among all regions, excluding Outlying Areas. (See table 6.)

Direct Operating Costs by Disbursement Purpose

The disbursement pattern of public television licensees' direct operating costs varied considerably among various types of licensees. Of $113 million total direct operating costs, salaries and wages absorbed approximately $58 million and other expenses approximately $55 million. (See table 24.) Institutions of higher education and local school systems licensees spent most of their money on salaries and wages (63 percent and 67 percent, respectively), while State/municipal licensees and community licensees expended more of their budget (51 percent and 54 percent, respectively) on other expenses. (See tables 25 through 28.)

4/ This was largely due to the merger between WNET and a large production center, NET, during the fiscal year. All costs of production of the former NET were absorbed by WNET.

Public television licensees spent money largely on production (29 percent of the total), technical (23 percent), programming (15 percent), and general and administrative purposes (14 percent). As compared with other types of licensees, community licensees spent heavily on production (34.4 percent of the total), and development and fund raising (6.1 percent), while local public school systems spent relatively heavily on instructional and school services (22 percent) and less on programming (8.4 percent). (See table 21.)

The North Atlantic region expended 36 percent of the direct operating costs for production and a slim 4 percent for instructional and school services, while the Southeast spent heavily on technical purposes (30 percent) and relatively significantly for instructional and school services (13 percent). The larger licensees tended to expend a larger proportion of direct operating costs on production. (See tables 22 and 23.)

Capital Expenditures

Current Capital Expenditures

Total capital expenditures for television operations of public television licensees amounted to $29,965,207 during Fiscal Year 1971. This represents a 43 percent increase in capital expenditures in Fiscal Year 1971 over that of the previous fiscal year, when the public television licensees expended $20,460,290. The capital expenditures ranged from 0 to $2.6 million, and 15 of the total 133 licensees reported no capital expenditures. Of the total capital expenditures, 38 percent (the largest portion) was spent by community licensees followed by State/municipal licensees with 29 percent and institutions of higher education with 25 percent. (See highlights and table A-46.)

Public television licensees expended their funds on buildings (21 percent of the total), transmitters (12 percent), videotape recorders (10 percent), antenna systems (9 percent), etc. Trends are discernible within categories of licensees. Licensees among institutions of higher education spent largely on buildings, while community licensees expended on land and land improvements. Those in the Great Lakes and Plains region spent largely on buildings, while those in the West and Southwest region expended on land and land improvements.

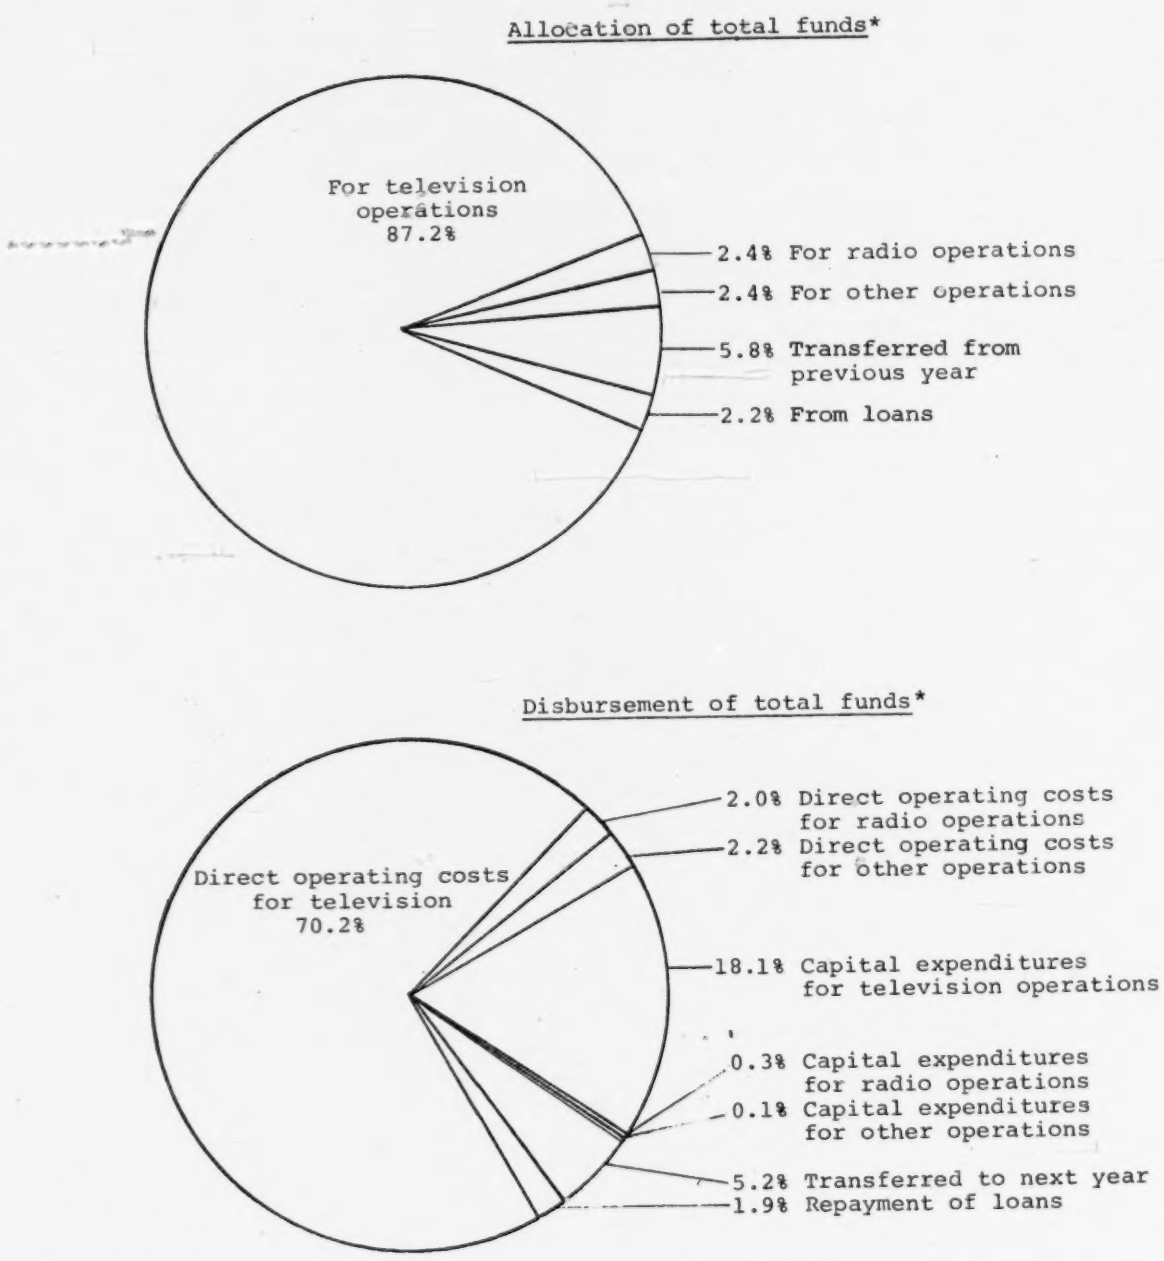
Among regions, the Southeast led in the amounts expended by licensees; however, in terms of median expenditures for all licensees, the Outlying areas spent the largest amount ($607 thousand). It was found that the larger the licensee, the larger the capital expenditures in terms of median expenditures. (See table 7 and tables A-46 through A-48.)

Total Capital Expenditures to Date (Cumulative Capital Expenditures for Television Operations)

By the end of Fiscal Year 1971, total capital expenditures to date (accumulated capital expenditures) had reached $212 million. Community licensees and State/municipal licensees reported the largest amounts of capital expenditures to date ($78 million and $62 million, respectively) and State/municipal licensees led the amounts in median expenditures ($2.4 million). It was found that the larger the licensee in adjusted budget size, the larger the total capital expenditures to date.

Current capital expenditures in a given fiscal year may not accurately represent the overall capital investment and viability of the licensees in operation. Due to the fact that the capital expenditures are for acquisition of relatively durable goods and facilities, a licensee may not expend a sizable amount for these purposes after having made an initial investment. (See table 7 and tables A-49 through A-51.)

Figure 1.--Percent distributions of allocation and disbursement of total funds of public television licensees: Aggregate United States, fiscal year 1971



Allocation of total funds*
For television operations 87.2%

APPENDIX A

SURVEYS OF PUBLIC TELEVISION LICENSEES

I. History and general descriptions of surveys of public television licensees: 1969-1971

In July of 1969, the Corporation for Public Broadcasting (CPB), aware of the need for credible statistics and information concerning its constituents' broadcasting operations, issued a grant to the National Association of Educational Broadcasters (NAEB) to develop and implement a management information system.

In order to develop an appropriate survey instrument, various existing survey forms were examined and selected key people within the broadcasting industry and among station personnel were interviewed. The findings from these examinations and interviews were incorporated into the design of the Fiscal Year 1969 survey instrument.

The Fiscal Year 1969 survey for public television licensees (the first comprehensive survey of this kind) was launched at the beginning of 1970. The survey instruments were forwarded to the 124 known public television licensees. Of these, 120 returned completed questionnaires. Because of failures in basic record-keeping on the part of the licensees and possible ambiguities of the questions in the survey instrument, some data could not be obtained from certain stations. These categories were dropped for all licensees and not included in the computer files. In July of 1970, the information project was moved under the direct administration of the CPB and work of establishing computer files of selected data gathered by the Fiscal Year 1969 survey was completed.

Before the Fiscal Year 1970 survey was undertaken, the experience gained through the 1969 survey was applied to revising and refining the instrument and to clarifying ambiguities noted in it. For the Fiscal Year 1970 survey, the CPB received 136 responses out of 137 licensees contacted.

The contents of the Fiscal Year 1971 survey instrument were basically the same as the ones of the previous year; however, the survey was conducted in two parts: Part I was intended to collect information on quantitative data which varies on a fiscal year basis, such as the financial, broadcast schedule, and employment data, and Part II was designed to obtain information on static data, such as listings of management personnel, station facilities, and studio equipment. The Part II instrument consisted of listings of computer records of these static data of the

previous year and required only corrections to update the information. Out of 142 licensees contacted, all 142 responded for the Fiscal Year 1971 survey.

II. Processing procedures and list of computer files for public television licensees

Raw data from the survey questionnaires were manually edited and corrected for obvious errors. Follow-up procedures were initiated with licensees to make the necessary corrections. Verified information was then entered into the computer files and checked again to insure accuracy.

The Corporation has constantly modified and improved its management information computer files, primarily through building in time-sharing and remote-access retrieval capabilities.

The following is a list of the computer files developed from the data obtained through the annual surveys of the public television licensees:

1. Financial file -- Financial and promotion data
2. Employee file -- Employee data
3. Station file -- Station and transmission facilities and broadcast data
4. Studio file -- Studio facilities and production data
5. Personnel file -- Names, addresses, and phones of management personnel

APPENDIX B

QUESTIONNAIRE ITEMS

Data in this report derived from the following items which were included in the survey of public television licensees, fiscal year 1971, conducted by the Corporation for Public Broadcasting.

Schedule A - Income, Revenues, and Funds

(Please include all monies and funds received or receivable whether for operations, capital, investment, or reserves and whether expended during the reporting year or not. Do not duplicate receivable funds reported last year. Do not include gifts of equipment and services or the value of shared facilities.)

Sources of income, revenues, and funds:

	(1) TOTAL TV STATION OR NETWORK OPERATIONS	(2) TOTAL RADIO STATION OPERATIONS	(3) ALL OTHER INCLUDING: CCTV, ITFS & ACADEMICS
1. Amounts provided directly by agencies of the federal government (Do not include CPB)			
NAME OF AGENCY / AMOUNT			
Ed'l. Brdcstng Facilities Grants (HEW) $_____			
_____ _____			
_____ _____			
_____ _____			
Total Federal Government	$_____	$_____	$_____
2. Amounts provided by public broadcasting agencies such as: CPB, NET, NITC, GPNITL, other PTV stations and networks, regional networks and any other agency engaged principally in production or operations for non-commercial broadcasting.			
NAME OF ORGANIZATION / AMOUNT			
CPB - General Support Grants $_____			
CPB - All other funds _____			
_____ _____			
_____ _____			
Total Public Broadcasting Agencies	$_____	$_____	$_____
3. Local boards and departments of education	_____	_____	_____
4. Other local government or agency sources	_____	_____	_____
5. State boards and departments of education	_____	_____	_____
6. Other State government or agency sources	_____	_____	_____
7. State colleges and universities	_____	_____	_____
8. Other colleges and universities	_____	_____	_____
9. Underwriting of specific programs	_____	_____	_____
10. Foundations - National	_____	_____	_____
11. Foundations - Other	_____	_____	_____

12. Auctions (Expenses related to auction were: $_____)	_____	_____	_____
13. "Profits" from subsidiary enterprises (Please describe briefly _____)	_____	_____	_____
14. Commercial stations and network contributions	_____	_____	_____
15. Subscribers and individuals (Please estimate the number of paying members: - @ $50.00 or more #_____ - @ less than $50.00#_____)	_____	_____	_____
16. Business and other organizations not includable elsewhere	_____	_____	_____
17. Other production contracts not includable elsewhere	_____	_____	_____
Other (Please specify):			
18. _____	_____	_____	_____
19. _____	_____	_____	_____
20. _____	_____	_____	_____
21. _____	_____	_____	_____
22. All other sources of funds	_____	_____	_____
23. Total income, revenues, and funds (Sum of lines 1 through 22 preceding)	$_____	$_____	$_____

- How much of the total income on line 23 above would you estimate or attribute to ITV services: Broadcast TV only $_____

- Total transfers from reserve accounts, investments, cash, building funds and from other balances of funds appropriated or encumbered and received in previous years $_____

- Received from loans, notes, and other borrowed amounts $_____

Schedule B - Expenditures, Outlays, and Allocations of Funds

	(1) TOTAL TV STATION OR NETWORK OPERATIONS	(2) TOTAL RADIO STATION OPERATIONS	(3) ALL OTHER INCLUDING CCTV, ITFS & ACADEMIC
Budgeted operating expenses: (Do not include capital equipment or depreciation)			
Technical			
Salaries and wages			
Other expenses			
Programming			
Salaries and wages			
Other expenses			
Local production			
Salaries and wages			
Other expenses			
Instructional and school services			
Salaries and wages			
Other expenses			
Development and fund raising			
Salaries and wages			
Other expenses			
Promotion			
Salaries and wages			
Other expenses			
Training and personnel development			
Salaries and wages			
Other expenses			
General and administrative			
Salaries and wages			
Other expenses			
All other operating expenses			
Salaries and wages			
Other expenses			
Total budgeted operating expenses (Sum of the above)	$	$	$

- Costs absorbed by other institutions _____

- Transfers of funds to reserves, investments, building funds, cash or encumbered and deferred to next fiscal year _____

- Monies used for the repayment of notes, debts, and credit purchases _____

Schedule C - Capital Expenditures

	(1) TOTAL TV STATION OR NETWORK OPERATIONS	(2) TOTAL RADIO STATION OPERATIONS	(3) ALL OTHER INCLUDING CCTV, ITFS & ACADEMIC
1. Capital expenditures during the 1971 fiscal year:			
a. Land and land improvements			
b. Buildings			
c. Equipment - Antenna system			
- Transmitters			
- Translators			
- Microwave equipment			
- CATV equipment			
- Control room equipment			
- Video tape recorders			
- TV cameras (live)			
- Film chains			
- Other film equipment			
- Audio equipment			
- Other studio equipment			
- All other equipment			
d. Remote vehicle units			
e. Other automotive equipment			
f. Furniture and office equipment			
2. Total capital expenditures during fiscal 1971 (Sum of items a through f above).	$	$	$
3. Total capital expenditures to date (Sum of total original cost of facilities, equipment, etc., on hand as of 6/30/70, plus 2 above, plus value of gifts--excluding money--and donations of equipment, minus original cost of equipment sold, scrapped or disposed of during fiscal year 1971.	$	$	$
